2- Responsible person: Abdelaziza Moyo
This dataset was first prepared by Michael Mills (A. P. Leventis Ornithological Research Institute) and collaborators (2010).
Assistance: Rui Figueira (GBIF-PT)

3- Geographic coordinates were determined following procedure and recommendations by Chapman & Wieczorek (2006)
Coordinates: geographic format, decimal degrees, datum WGS 84
Spatial coverage: The geographic range of the records covers Angola.
Coordinates: 18°35'24''S and 4°5'60''S Latitude; 11°5'24''E and 25°1'48''E Longitude

4- 35.301 specimens of The Birds Collection have been recorded, 34.583 belonging to Angola (97.6%) collected between 1958 and 1975 in 689 different localities of 17 provinces (Figs. below), standing out a good spatial coverage of Huíla province; 719 specimens are from different 30 countries
The collection of Angolan Birds comprises 26 orders, 84 families (fig. next page), 335 genus and 642 species.
